

GIVING YOUR PEOPLE THE BEST DEFENSE AGAINST CYBER THREATS

Your employees need to understand the cyber threats that exist today to ensure your data is protected and your organization meets compliance standards.

Customized On-Line Cybersecurity Awareness Course

Accretive Solutions can work with you to develop an online course tailored to your industry and company to ensure your organization is protected. By customizing our existing content, we can quickly develop an online cybersecurity awareness course that provides your employees the tools and resources they need to be a successful and active participant in your cybersecurity process. The course delivers a stimulating and engaging learning experience to educate employees on good data protection behaviors. The course uses realistic and customizable examples to add relevance and interest to the content. By working with our base curriculum, we can remove, add and customize the existing content to ensure the course teaches your processes and meets your compliance standards.

Cyber threats within your organization are increasing each year. It's more important than ever to ensure that all employees know how to safeguard sensitive information. We work with you to customize both the content and look and feel of a course for YOUR organization so your employees are able to follow cyber security best practices, identify and report threats, and prevent unauthorized access. To see a short demo of a security course, please visit our web-site at: [insert web-site link]

Some of the topics our base curriculum covers includes:

Module 1: Values and Goals of this Training

Module 2: Why Data Security Matters

Module 3: What is Information Security?

Module 4: Protect Yourself

Module 5: Compliance & Regulation

Module 6: Reporting Suspicious Activity
